

**ARIZON®** is the only air structure company with an air flow engineering division and the expertise to design air handling systems specifically for grain and corn storage and aeration.

#### Advantages of an Arizon Structure:

- Exterior building material warranty of 15 years; expected life of 25+ years.
- Air Rotation® technology controls temperature and humidity.
- Withstands winds up to 150 mph and snow loads up to 50 lbs per square foot.
- UV protection for the building components and everything that is inside the building.
- Resists mildew, fungus, dust, and is fire retardant.
- Allows outside light in (translucent fabrics), eliminating daytime lighting costs.
- Quick installation.
- Building and contents can be insured.
- Temporary or permanent storage.
- Structural membrane is non-corrosive and galvanized steel cables and fans are used to minimize corrosion.

Arizon air structures are also used for a variety of applications, which include:

- Bulk storage of grain
- Bulk storage of fertilizer
- Methane capturing of manure
- Frame structure building for seed, machine and animal containment
- Horticulture
- Greenhouses
- Composting
- Equine riding arenas and stables
- Machinery storage and repair
